In addition, I get the flight time sending my DJI text log on the airdate. CON: The free account only records 100 flights. As stated, I created this sheet from scratch. Then I transfer this data to the log when you are back to my main computer. Try it and let us know how it works. Check out the instructional video to learn how to use your new onboard diper and click below to download it for free! Success! Check your and email, as Chris will send you onboard moment soon! We are using and improve this book and registration system in last years and recommend it for drivers of any other experience. Flight log guide is here that you insert all flight data relevant per flight. CON: The free account has limited resources. Regular agencies require you to produce records on demand. Let him emphasize, I didn't lower his sheet and then modify it. Presenting the drone flight and the maintenance log (DFML) Rev1.0. I searched a lot on the net for a drone flight record, but I never found one that covered everything I wanted on a trunk. There are some columns that have formulas like cell entries. It is no time for battery entry or one area to mark the date. In the case of an aircraft malfunction, your on-board day can provide information on the number of times a battery or Há © LI was used, which can help you solve or anticipate possible problems. Part of your implementation I liked, and some parts of your slogan that I felt were not it to me. There are two items to be manually inserted in this guide: the description of the drone (aircraft column) and its id/nickname (ID column) that you will use throughout the spreadsheet. EDIT: I tried some rough tests and seems to work on GS.
